Grzegorz Gancarczyk

DESIGNER

The collection was designed by Grzegorz Gancarczyk, a designer who has been part of Paged Meble since 2008 as a member of the Paged Design Team. He is a graduate of the Faculty of Wood Technology at the Warsaw University of Life Sciences.

His furniture designs have been nominated for numerous prestigious awards. The Nodo armchair, also designed for Paged, received recognition in the MUST HAVE design plebiscite.

The Bizo family was created for interiors where furniture needs to meet a variety of needs. Its calm and welcoming character makes it equally at home in residential and public spaces.

The collection launches with chairs on wooden bases. Metal-base versions will follow soon, with bar stools and a lounge chair joining the collection in a later release.

Bizo is a collection designed with comfort and durability in mind.
The wide seat and backrest provide stable support, while the metal base options enhance the durability of the models. Rounded shapes and natural materials bring a warm character to interiors.

The metal-base version will be available soon.

Bizo. Design: Grzegorz Gancarczyk.

The different Bizo variants allow the collection to be tailored to the character of each project.
The option to upholster the seat and backrest offers additional configuration possibilities.
The outer surface of the backrest remains smooth, highlighting the natural grain of the wood.

The Bizo chair was designed with comfort in mind, even during extended use.
The version with a wooden armrest provides additional support when sitting down and standing up. Lumbar support helps maintain a stable, upright position during prolonged seating, for example in a restaurant..

The metal-base version will be available soon.

Two bar stool versions, with seat heights of 65 and 75 cm, will soon join the BIZO collection.
Both versions will feature a backrest, providing stable and comfortable support, even with the higher seat. Upholstery can be added to both the seat and backrest for extra comfort. The bar stools will be available with either a wooden or metal base.
